**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I am the sole proprietor of an IT consultant business, supporting 5 small businesses (10-50 employees) who rely on access to the internet.

Even here in the center of Silicon Valley (Santa Clara, CA), I only have access to substandard DSL (128 kilobit!). Wireless doesn't have the bandwidth I require (2000GB/mo) for my consulting business at home, so I am actually stuck with only one provider (Comcast). I would love to have an alternative ISP, but there simply aren't any.

One of the rural businesses I support can ONLY use wireless, and they pay nearly \$200/month plus \$2000 in setup costs, because there is zero competition. This doesn't include the \$500/month they pay for cell phone data plans.
